# SYSTEM FEATURES:

## Patient Registration

- + Capture comprehensive patient demographics and contact information.
- + Assign unique patient IDs for efficient record management.
- + Upload and store identification documents and insurance details.

## Appointment Scheduling

- + Enable in-person appointment bookings.
- + Manage doctor availability & allocate time slots effectively.
- + Send automated reminders to reduce no-shows.
- + Allow rescheduling and cancellations with real-time updates.

## Billing & Invoicing

- + Generate OP/IP invoices and receipts for consultations, procedures, and services.
- + Integrate with insurance provider, such as NHIF, Jubilee for claim processing, billing and claim submission.
- + Track payments, outstanding balances & financial reports.
- + Apply advanced payments, discounts, credit notes, and other financial adjustments as needed.

## Doctor Consultation & EMR (Patient Records)

- + Maintain detailed patient medical histories & treatment plans.
- + Store lab results, radiology images, and prescription records.
- + Ensure data security with role-based access controls.
- + Facilitate quick retrieval of patient information across departments.

## Dental Module

- + Dental charting with visual tooth map for each patient.
- + Diagnosis and treatment planning with procedure logging.
- + Intraoral photo uploads and radiograph attachments.
- + Dental-specific billing, consumables tracking, and notes.
- + Custom dental templates for faster data entry.

## Physiotherapy Module

- + Patient condition tracking over sessions
- + Physiotherapy case sheets and customizable exercises
- + Session logging with therapist notes and outcomes
- + Package-based billing and visit scheduling
- + Therapist performance monitoring and reports

## Dialysis Module

- + Vitals tracking and session recording
- + Dialysis-specific stock usage (e.g., tubing, filters)
- + Session-based billing with NHIF or private insurance handling

## Pharmacy Management

- + Manage drug inventory, including stock levels & expiration dates.
- + Process prescriptions and dispense medications efficiently.
- + Monitor drug usage patterns and generate reorder alerts.
- + Integrate with billing for seamless financial transactions.

## Laboratory Management

- + Handle test orders, sample collections, and result entries.
- + Integrate with laboratory machines for seamless template-based result entry
- + Automate report generation and distribution to relevant departments.
- + Maintain quality control and compliance with regulatory standards.
- + Track reagent usage and manage lab inventory.

## CEO Dashboard

- + Patient Progress overview by day, department, and branch.
- + Doctor Progress tracking: patient load, performance.
- + Master Report: summarized business intelligence for admin-level review.
- + Visit Master: complete list of all visits with filters and status
- + Credit Approval monitoring and decisions.

## Patient Portal

- + Provide patients with access to their medical records & test results.
- + Facilitate communication between patients & healthcare providers.
- + Enhance feedback submission and medication history

## Radiology Management

- + Schedule imaging procedures.
- + Store and retrieve diagnostic images (e.g. X-rays, MRIs) digitally.
- + Integrate with EMR for comprehensive patient records.
- + Facilitate radiologist reporting and result dissemination.

## Inpatient Management

- + Oversee patient admissions, bed allocations, and discharges.
- + Monitor patient progress & update treatment plans regularly.
- + Nurse notes and vitals monitoring.
- + Manage room charges and other inpatient-related billing.
- + OT scheduling and doctor assignments

## Outpatient Management

- + Streamline patient visits from registration to consultation.
- + Manage queues & reduce waiting times with efficient scheduling.
- + Record clinical notes and prescribe treatments during visits.
- + Coordinate follow-up appointments & referrals as necessary.

## Operation Theater (OT) Management

- + Surgery scheduling and surgeon/assistant assignment.
- + Maintain surgical checklists and patient consent forms.
- + Track surgical instruments and sterilization processes.
- + Document intraoperative details & postoperative outcomes.

## Inventory Management

- + Monitor stock levels of medical supplies and equipment.
- + Automate purchase orders based on predefined thresholds.
- + Conduct regular audits and manage supplier relationships.
- + Ensure timely replenishment to avoid stockouts.

## Insurance & Claims Processing

- + Verify patient insurance coverage and eligibility.
- + Submit claims electronically and track their status.
- + Handle claim denials and resubmissions efficiently.
- + Maintain records for audits and compliance purposes.
- + Credit billing to insurance.
- + Outstanding follow-ups and approvals

## Reporting & Analytics

### Includes all key operational and financial reports:

- + Doctor-wise Revenue Report
- + Sales Visit-wise Report
- + Daily Sales Summary Report
- + Zero Value Sales Report
- + Sales Audit Report
- + Monthly Sales Summary
- + Department Sales Report
- + Cash Visit Outstanding Report

## Accounting

### Robust accounting and finance tracking:

- + Advance Deposit Summary/Report
- + Credit Notes / Canceled Bills / Canceled Invoices
- + Bill Credit Approvals
- + Refunds
- + Exceptional Billing Reports
- + Tally Transfers & Pending Transfers
- + Master Report
- + Cash Collection Summary User-wise
- + Branch Cash Summary
- + Claim/Invoice/Client overall Outstandings Reports

## SMS & Communication

- + SMS alerts for appointments, bills, results
- + WhatsApp notifications optional
- + Auto messaging based on events/triggers

## Miscellaneous
